

# LASERBLAST

Introduces

## “FunBlast”

**A lower cost, high throughput, money making alternative to a PC controlled laser tag system.**

**Ideal as an “add on” attraction for Bowling Centers, FEC’s, and Skating Rinks. No installation required. Take it out of the box, plug it in, and *start playing!* No complicated computer software to learn.**

### **Investment Protection**

The equipment is nearly identical to our rugged “HyperBlast” product. If you start with “FunBlast” and see that the added features make sense for your business, add a computer, software, and options for a full blown “HyperBlast” system.
